Commercial Asset Management

Asset Oversight & Invoice Management

Reduce risk and maximize returns portfolio-wide

Our commercial asset management (CAM) applications help you stay on top of portfolio risk and increase project revenue. Get a 360-degree view of your assets with our Asset Oversight solution. And stay on top of portfolio risk and billing while increasing project revenue with Invoice Management.

Performance monitoring, financials, and powerful reporting tools give you the insights you need to make better decisions, and automated workflows allow you to spend less time verifying data accuracy and more time making smarter real-time decisions.

Key business drivers

Maximize scalability and efficiency

Work smarter and faster with automated workflows for real-time decision-making. Create work orders and schedules, set up automatic invoicing, and never miss compliance or contractual obligations.

Stay connected to your data

You can spend more time making real-time decisions and less time verifying data accuracy. Our 50+ connections automatically update data from your monitoring and other software systems.

360-degree view of your assets

Detect and correct underperforming assets quickly with the CAM application's central asset registry. Maintain full insight with performance monitoring, financials, and powerful reporting tools.
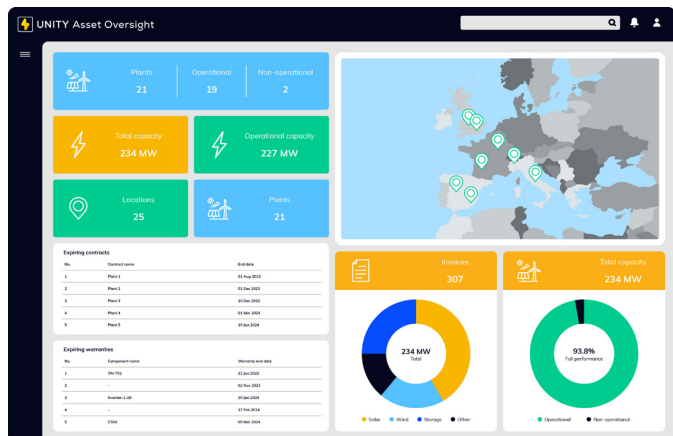

Seamless collaboration with your team

Our multi-language platform will keep teams of all sizes connected. Stay organized and manage your projects smarter. Pipeline management and collaboration has never been easier.

Commercial asset management for a 360-degree view of your clean energy portfolio

Asset Oversight

Interoperability with third-party software
Seamless integration with your existing software ecosystem drives efficiency and reliability in financial settlements and enables easy and dependable transactions.

Plant & portfolio management
Stay informed and manage your assets more effectively with centralized access to plant- and portfolio-level data at your fingertips.

Contracts & compliance
Work smarter and faster with automated workflows to ensure you never miss compliance or contractual obligations.

Reporting & performance monitoring
Quickly streamline reports with our drag-and-drop report editor. Effortlessly view performance data for a portfolio or a plant using automated connections to your data sources.

Warranty & insurance claims management
Manage claims with streamlined processes. Track warranty and insurance claims from start to finish at plant and portfolio levels.

Centralized invoice management
Access all invoice-related data from a single, centralized platform. Easily manage and track invoices across multiple projects and assets, streamlining your financial operations.

Monitoring & alerts
Maintain cash flow by staying informed about payment statuses. Monitor the status of your invoices with instant alerts for any issues or delays.
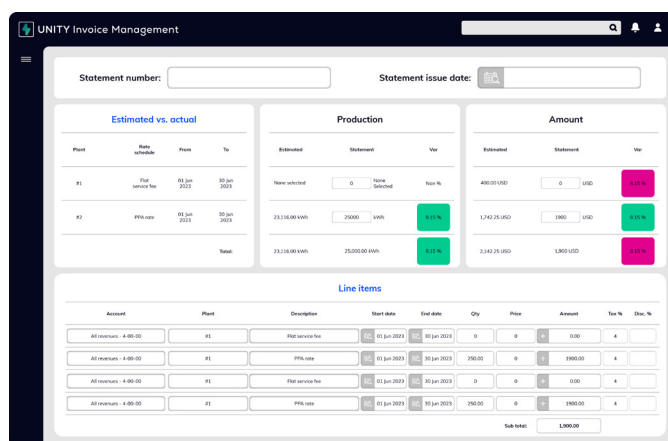

Customizable reporting tools
Improve your invoicing processes with powerful, customizable reporting tools. Generate detailed invoice reports and tailor templates to access actionable insights that enhance efficiency.

Audit trails & historical data
Ensure transparency and meet auditing requirements with comprehensive audit trails and easy access to historical invoicing data.

Invoice Management

Automated invoicing & financial management
Reduce manual entry and errors with automated workflows for recurring billing and invoicing tasks. Set up automatic invoice generation based on predefined schedules and parameters.
